

SHARATH KUMAR

Assistant Engineer | 6 Years Experience
+91 8217727167 | sharath8793@gmail.com | Bengaluru, India

PROFESSIONAL SUMMARY

Motivated and detail-oriented Assistant Engineer with experience in Building Management System (BMS) operations and facility maintenance. Skilled in monitoring and maintaining HVAC, electrical, and control systems to ensure reliable building performance and energy efficiency. Experienced in troubleshooting controllers, sensors, and field devices, coordinating preventive maintenance, and supporting system commissioning. Strong technical understanding of automation, electrical systems, and equipment diagnostics with a focus on operational safety and uptime. Seeking technical expertise to contribute to a growth-oriented organization in facility management or building automation.

KEY SKILLS & COMPETENCIES

- Building Management System monitoring and operation
- Alarm handling, trend analysis, and system diagnostics
- Controller and field device troubleshooting
- Electrical panels and distribution systems
- Sensors, actuators, and control devices
- Basic PLC / DDC controller understanding
- Control wiring and panel fault identification
- IP-based device connectivity and LAN fundamentals
- Controller-to-server communication troubleshooting
- Preventive and corrective maintenance planning
- Equipment inspection and calibration support
- Breakdown analysis and root cause identification
- Maintenance logs and service reports
- System performance tracking
- Energy usage observation and reporting
- Safety compliance and operational documentation
- Basic data analysis for performance monitoring
- Report preparation and dashboard awareness
- Structured troubleshooting approach
- Technical documentation and system tracking

PROFESSIONAL EXPERIENCE

Assistant Engineer – Maintenance (BMS)

The Nahars Engineering India Pvt Ltd, Bengaluru (Nov 2022 – Present)

- Responsible for operation & maintenance of Building Management System (BMS) for facility infrastructure.
- Monitor and control HVAC systems including chillers, AHUs, FCUs, and ventilation units through BMS.
- Perform routine inspection and preventive maintenance of electrical panels, sensors, controllers, and field devices.
- Troubleshoot faults in BMS networks, controllers, and communication protocols (BACnet/Modbus).
- Coordinate with electrical, mechanical, and facility teams for system reliability and uptime.
- Maintain logs, service reports, and maintenance schedules for equipment performance tracking.

- Support energy optimization initiatives by analyzing system trends and alarms.
- Assist in commissioning, testing, and calibration of new building equipment integrated with BMS.

Data Analyst – Transaction Operations

Mphasis, Mangalore (Jun 2018 – Jan 2022)

- Analyzed high-volume transaction data for operational insights.
- Designed performance and discrepancy reports.
- Collaborated with cross-functional teams for optimization.
- Improved data accuracy through audit-driven process improvements.

KEY PROJECTS

AI-Powered Applicant Tracking System (ATS)

- Designed and developed a full-featured ATS using Node.js, MySQL, MSSQL, and AI integration.
- Implemented resume parsing, duplicate detection, blacklist verification, and rejoin validation.
- Built AI-based resume scoring using LLMs, RAG, Transformers, and NLP techniques.
- Developed HR/Admin portals, chat-based candidate forms, and LOI tracking system.
- Integrated secure authentication with role-based access control.

EDUCATION

Bachelor of Mechanical Engineering

Sahyadri College of Engineering and Management (2012 – 2016)

AI & TECHNICAL TRAINING

- Trained in Large Language Models (LLMs), Retrieval Augmented Generation (RAG), and Transformers
- Advanced NLP, Resume Intelligence Systems, and AI Automation
- Machine Learning & Predictive Analytics
- Cloud & DevOps Practices
